Saiasi Foundation

Saiasi Foundation

Description

A community that is a unique place to unleash the imagination of individuals, young and old in rural communities by introducing them to restoration and archival processes, creation of new or restoration of existing two and three dimensional private and public artworks mostly of larger size through the use of Science, Technology, Engineering, and Mathematics (STEM).

Saiasi Foundation

Introduction

Saiasi Foundation has the sole mission of creating a community, physically and intellectually, that is a unique place for subject matter experts and artists to unleash the imagination of our residents and youth in rural communities by introducing them to projects involving the restoration of existing artworks and the creation of new ones, including archival processes and techniques and in the process create interest in potential career opportunities in Science, Technology, Engineering, Art, and Mathematics (STEAM).

We accomplish our mission by inviting selected subject matter experts and artists where through their creations, a series of educational videos are professionally produced showing how these activities are applied practically.

Our goal is to create at least 52 educational videos every year and have all episodes available to at least 1 million students over the next 4 years, and these will also become part of related workshops, in-house activities and onsite and off-site projects. Additionally, provide a place for the community to visit, enjoy the art gallery, functional items, artworks and the works that become available after each STEAM creative session is completed.

Saiasi Foundation

Activities

- Still and Video Photography
- 2D and 3D Art
- Electronic Inter-Media
- Graphic Design
